THE ENCYCLOPEDIA BRITANNICA

Revised and Amended in Connection With a Year's Subscription to THE STIRLING NEWS-ARGUS.

The Encyclopedia Britannica, Revised and Amended, is published in 10 large, octavo volumes of nearly 7,000 pages, 14,000 columns, and over 8,500,000 words.

HOW TO GET IT.

The complete work of 10 volumes with the NEWS-ARGUS by paying 50 cents a week for the Encyclopedia complete and paper for one year.

TO GET IT, send your order to the publisher, 100 Queen's Park, Toronto, and you will receive prompt attention.

YOU CANNOT BUY

The Encyclopedia Britannica, Revised and Amended, unless in connection with a year's subscription to THE NEWS-ARGUS. The publisher's price is \$20 a set, for the great work of 10 volumes.

WHAT IT CONTAINS.

The Encyclopedia Britannica, Revised and Amended, contains about 7,000 pages, 14,000 columns, over 8,500,000 words—altogether an amount of reading matter equal to about 100 times the amount of the Bible.

It contains the most complete and up-to-date information on all subjects of human knowledge, from the history of the world to the latest scientific discoveries.

WHY IT IS THE BEST.

Because it contains the best features of the best English and American Encyclopedias, it is the most complete and up-to-date work of the kind ever published.

It is the only work of the kind that is so complete, so up-to-date, and so easy to use.

GOOD LIVE AGENTS WANTED.

How Ten Is Prepared.

Mr. T. Conant, who recently made a trip around the world in the ship "The Gladiolus," is a letter to the Gladiolus.

He gives the following account of a visit to the large firing range at Yokohama, Japan.

Most of our passengers left off to the capital, for the day, it being only eighteen miles away, and a return ticket costing only 50 cents.

When these leaves are picked they have no more of a tea taste than a raw coffee bean, roasted, has of coffee. Now, let us suppose he wants to produce black tea, which some of us insist is the purest of all.

He brushes the leaves and lets the sap exude, and allows it to remain in the sun until it turns black, and that's black tea. But like cutting open a ripe apple and allowing it to stand a few moments when the incised sides quickly turn brown, so fermentation sets in.

Ordinary tea is not so brewed, or left to stand in the sun, but it is put in an iron vessel over a charcoal fire and constantly stirred for an hour. During this stirring a description of scaptoles is added to each five pounds as stirred in the pot, that being the quantity each person sips. For Girls About to Marry.

An innumerable light plant will be introduced to the girls of the bright girls who are about to marry.

Do not marry, my dear, until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

So, my dear, do not marry until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

So, my dear, do not marry until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

So, my dear, do not marry until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

So, my dear, do not marry until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

So, my dear, do not marry until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

So, my dear, do not marry until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

So, my dear, do not marry until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

So, my dear, do not marry until you and Jack have a small bank account. I take it that you are both of you, and I think you are the more independent.

Therefore you are the more independent, and you are the more independent, and you are the more independent, and you are the more independent.

MILNE & CLUTE

HERE we are in August. The busy season for the farmers when they haven't time for anything but getting in their crops. Their wives have a little spare time. It would be well employed by coming to Stirling and seeing the inducements we are offering during the hot weather. Now is the time to buy your summer dress goods if you want them cheap. What we have left are going at a very low figure. Our patterns are neat and tasty, and the price extremely low. We are cleaning out our white stockings and laces at cost. Now is the time to buy. Don't fail to see them. Look through our Prints, Cottons, and Shirtings. The prices will really surprise you. What Carpets we have left will not remain long. The prices sell them without any persuasion.

In advertising we aim to tell the truth and stick strictly to what we advertise. We won't tell you one thing and do another. All our goods are marked in plain figures and at the lowest price. One price and cash.

Similar bargains will be found in our Groceries, Boots and Shoes, and Crockery.

We don't urge you to buy but see us before buying.

MILNE & CLUTE,
STIRLING, - ONT.

P. S.—Flannelette Shirts going for the balance of the at a big reduction.

ADVERTISING NOTICES.
To the local columns will be charged as follows:
Regular Advertisers—Three lines and under, 10c. per line; over three lines, 15c. per line. Matter not in larger than one line, 10c. per line.
To Transient Advertisers—10c. per line each insertion. No insertion less than 2c.

RAILWAY TIME TABLE.
Trains call at Stirling station as follows:
GOING WEST. GOING EAST.
Miles. 34. m. Miles. 34. m.
Miles. 34. m. Miles. 34. m.

HOME MATTERS.

Mr. G. Wilbert Jones is home from Rochester to spend his holidays.
Mr. Judson Bush, left last week for Burlington, where he will remain for some time.

Mr. Peter Martin, who has been in Toronto for some time past, employed by the Massey firm, returned home on Saturday last.
Rev. Mr. Jamieson was visiting old friends and renewing acquaintances in the village last week. He preached at John Street Presbyterian Church, Belleville on Sunday.

Mr. A. S. Taylor, C. Wheeler, E. Johnson and R. Graham, left on Tuesday morning for the Northwest. The three former will go as far as Moosemin, and Mr. Graham will stop at Melita.
Photographer—Can't you assume a more pleasant expression than that? Just think of your best girl a few minutes. Young Man (sadly)—It wouldn't do any good. She refused to look at a week ago.

Not for bargain in jewelry. Call on A. D. Hassell, in the village block. Fine watches, clocks and jewelry. Repairing a specialty. Also a full line of Spex on hand. Remember the address A. D. HASELL, Belleville and Stirling.

Some cases of diphtheria are reported from the northern part of Rawdon, near the Central Ontario Junction. Two deaths have occurred, and another is now ill with the disease. The cases are believed to have originated from impure water in a cistern.

The month of August, or early in September, is the best time to set out young plants to make a strawberry bed. Much time with straw or very strong manure after setting them out, and they will get well rooted through the winter.

Mr. W. Boulter, of the Pictou Canning factory employs from 75 to 125 hands. This year he put up 72,000 quarts of strawberries, one farmer realizing \$1,000 from the season. The produce of 60 acres of corn, 160 acres of wheat, and 125 acres of oats will be put up, as well as many other fruits and vegetables. About 500,000 cans will be put up altogether.

Rev. J. D. Knox, brother of our townsman, Mr. Thos. Knox, was recently ordered for special work, and left for British Columbia on Tuesday last. He was engaged in mission work under the direction of the Missionary Society of the Methodist Church. Mr. Knox preached in the Methodist Church in this village on Sunday evening last, and gave a very interesting discourse.

Mr. Joseph Craig, collector of Island Revenue at Prescott, died suddenly on Friday last. He had taken the morning train for Belleville for Peterborough, but before reaching Stirling he was noticed by the conductor to be ill. A telegram was sent to a doctor to meet the train at Peterborough, where it was found that he was suffering from an attack of paralysis which proved fatal in less than two hours after his arrival there. He was the wayward wife and family at Stony Lake, where they had been camping out, and where he intended to spend his holidays.

Losses by fire—Money spent for cigars. Mr. S. W. Lloyd, a merchant and partner in the firm of Croydon, had his right arm badly injured by the accidental discharge of a gun, while out hunting and fishing at Beaver Lake one day last week.

Before leaving Macdonald for this place, a number of the friends of Mr. and Mrs. T. W. Campbell met and presented her with a beautiful Bible and hymn book, accompanied with expressions of regret at their departure.

At the Central Ontario Junction, on Tuesday evening last, a large number of persons took the C. O. train for Manitoba and the Northwest, taking advantage of the cheap excursion fares. The coaches were crowded to excess.

During the absence of Rev. J. M. Gray to Manitoba and the Northwest, there will only be service in the Presbyterian Church in this village on Sunday evenings. Rev. Mr. Gray left on the 26th July, and expected to be about six weeks.

Dr. Decker left for Kingston on Monday last, and is expected home again on Saturday. It is reported that he will not return alone but will bring with him a partner to share life's joys and sorrows. The News-Aurora has the following notice:

Read the advt. of the Ontario Mutual Life Co. In this issue, and you will find substantial gains in every item worthy of notice, while the interest more than paid all death claims. This is a very satisfactory showing which should call the attention of all in reading matters.

On Friday evening last there was held at Bethel a union meeting of the Mount Pleasant and Bethel Y.E.C.A., for the purpose of reorganizing. They intend to put forth an increased effort to carry out their motto: "To do good and be good." After a short religious service supper was provided. The Bethel association, after which there was a short programme of recitations and singing. The Bethel association meets on Tuesday evenings, and they extend a cordial invitation to any one to be present.

It frequently happens that a man neglects to pay a debt when it is due, and this in consequence prevents others from paying their just debts, and thus a whole series of unpaid workers may be kept back their various troubles to a single delinquent. Such people will say that in the end they pay all their own bills, but this is not the case. The money they owe, without this justice has not been rendered. Truly payment can never atone for the injury that may have been inflicted. No regret, no apology, no added interest even, can ever undo what has been done, or restore what, by their negligence and indifference, has been taken away.

There are some bad boys in this village and vicinity and it would be well if parents would look a little more closely after their boys. Of late several of these have been making raids into gardens, stealing early apples, etc., and are becoming more bold in their operations every day. At the present rate of going it will not be long before they are candidates for the police and being sent to the penitentiary in this matter, as did they exercise the proper control over their children, and not allow them to be the streets at all hours of the night, they would not thus become law breakers.

We have the names of several of these boys, thieves, and if the evil is not stopped they will figure in a magazine's court, and then they can have the pleasure of seeing their names in print, with full particulars. Both parents and boys had better take warning, as we mean business.

The Cheese Market.
At the Belleville cheese market on Tuesday last there were offered 507 boxes white and 140 boxes colored cheese, making a total of 647 boxes. Sales were made of both white and colored at 80c. to 85c.

At Ingersoll the market is reported as quiet with no sales—buyers offering 85c. and sellers holding out for 90c.

At Montreal the market is rather quiet. The export trade is weaker, owing to the low prices ruling in England, which give but little margin to the shipper. Prices are unchanged. The quotations are—85c. to 85c. for finest white, and 80c. for finest colored. Extra fine cheeses are selling at 85c. The Liverpool quotations same as last week, etc.

Struck by Lightning.
TARROW, July 30.—An accident occurred in Tarrow village last night about 11 o'clock. Three boys, named Arthur Cowie, Clayton Potts and Gerald Macdonald, who had been spending the day at the point, were returning in their boat to Twelve O'clock Point on this day, when they were caught, and when about a mile from the western entrance of the canal a thunderstorm came on and the boat was struck by lightning and the boys were knocked senseless, and when they came to themselves they could find nothing of their companion Cowie, who, it is supposed, was also struck, and in that condition fell out of the boat and was drowned. Search is being made for the body but without success. His hat was found floating near the scene of the accident.

A later dispatch from Tarrow states that the body of Cowie was found on the beach of the Crows two years ago.

BELEVEILLE, July 30.—During a thunderstorm last night, Rev. Mr. Munro's house was struck by lightning and damaged to the extent of \$50.

PICTON, July 30.—A very severe storm of rain, thunder and lightning passed over this section last night. Anthony Demill, of the third concession of Pictouville, and Warring, Hilliers, and Thomas Gallagher, all lost a horse and their corn and wheat from lightning stroke. Demill also lost one horse which was confined in the barn.

A Happy Marriage.
The Bancroft correspondent of the Madoe Press furnishes that journal with the following item:
A special session of the Bancroft Police Court was held at the Town Hall here late in the evening of the 24th inst. for the purpose of trying a charge of rape preferred against Gilbert Woodcock by Louisa Wright.

The evidence while not absolutely conclusive as to the degree of criminality was sufficiently strong to warrant a commitment for trial. The prisoner was therefore placed in the village jail and will appear at Belleville next day, and they went to the hotel to pass the night. A number of the residents of the village were present at the evening discussion of the event of the evening, and speculating on the probable consequences of the trial.

It is suggested that the idea of cutting the gordian knot by tying a nuptial one. With this suggestion, Mr. Woodcock was released from his bed and the trial was made in regular form. The happy couple started on their wedding trip next morning, accompanied by the congratulations of their friends.

The Dominion Illustrated.
The handsome illustrated article on the Oshkosh, of British, which appears in the last issue of the Dominion Illustrated, should be read by every one interested in the early history of Canada. In the same number is a delightful article by Miss Macdonald on the Augustan Days of Edinburgh recalling memories of Scott, James Smith, Jeffery, Brougham, Sir William Macdonald, a host of other great names. If Blake profited from the Dominion Illustrated, there are letters from London, Toronto and Halifax. The Saginaw gives the picture of the Dominion Illustrated. A full page portrait of the Emperor of Germany is reproduced, also views in St. John's, Nfld., and other fine engravings. The volume is a fine one.

Agitating for a Division of J. BOLDRICK & SON

RECEIVED this week their first case of Fall Suitings which will be laid on one side until SEPT. 1st, when the balance will follow. "Our" reasons for buying so early are these: That the first selection is always the best, and our present customers AND WILL-BE CUSTOMERS (as we feel confident our trade must increase) will have the pleasure of knowing that the goods are the newest and most select in the market. Seeing these goods must bring forth an expression of admiration. Our Fall Sample Book contains

146 Patterns in Suitings, Pantings & Overcoatings

Just think, some of our customers say if we had not such a variety they could make a selection easier; but we like to show Tweeds as this is our specialty and receives our first attention.

P. S.—Until SEPT. 1st we will offer special inducements in Summer Suitings, as we still have a nice range to choose from.

J. BOLDRICK & SON.

2—Surplus, 38,911
3—Cash Income, 40,958
4—Reserve for the security of Policyholders, 192,741

The Interest Income for 1890 exceeded the Death Losses for the year by \$14,416.

S. BURROWS, Special Agents. GENERAL AGENTS, Belleville.

THE VIRTUES OF BORAX.

The excellent washerswomen in Holland and Belgium, who "get up" their linen so beautifully white, use refined borax as a washing agent instead of soda, in the proportion of one large handful of powder to about ten gallons of boiling water. They use it in soap nearly all the time. The large washing establishments also use the same. For lace, cambric, etc., an extra quantity of the powder is used; for crinolines, a smaller quantity is used. A strong solution is necessary. Borax being a neutral salt does not in the slightest degree irritate the texture of the linen. Its effect is to soften the hardest water, and therefore it should be kept on every toilet table. Its taste is so pleasant that it is used for cleaning hair, and is an excellent dentifrice, and in hot countries it is used in combination with tartaric acid and bicarbonate of soda as a cooling beverage. Good tea cannot be made with hard water; all made by adding a teaspoonful of borax powder to an ordinary sized kettle of water, in which it should boil. The saving in quantity of tea used will be at least one-half.

THE ENCYCLOPEDIA BRITANNICA

Revised and Amended in Connection With a Year's Subscription to THE STIRLING NEWS-ARGUS.

THE STIRLING NEWS-ARGUS.

The Encyclopædia Britannica, Revised and Amended, is published in 10 large, octavo volumes of nearly 7,000 pages, 14,000 columns, and over 8,500 woodcuts.

HOW TO GET IT.

The complete work of 10 volumes with the News-Argus by paying 60 cents a week for the Encyclopædia complete and paper for one year.

YOU CANNOT BUY

The Encyclopædia Britannica, Revised and Amended, unless in connection with a year's subscription to THE NEWS-ARGUS. The price was \$24.00 when we gave a set and a year's paper for \$20. That is what you get by patronizing a live newspaper.

WHAT IT CONTAINS.

The Encyclopædia Britannica, Revised and Amended, contains about 7,000 pages, 14,000 columns, over 8,500 woodcuts, and a full and complete index. It is the most complete and practical information of any people never before of access to the history of the world, the progress of science, the state of the arts, and the condition of the human mind. It is a perfect library of general knowledge, and is the most valuable work of the age. It is a perfect library of general knowledge, and is the most valuable work of the age.

WHY IT IS THE BEST.

Because it combines the best features of the best English and American Encyclopædias, and is written by the foremost men of the age at a cost of more than a million dollars. It is the most complete and practical information of any people never before of access to the history of the world, the progress of science, the state of the arts, and the condition of the human mind. It is a perfect library of general knowledge, and is the most valuable work of the age.

GOOD LIVE AGENTS WANTED.

JAMES CURRIE, Publisher, STIRLING, - - ONT.

Nearly 150 Years Old.

Denver, says the News of this city, is a curious place and is often visited by remarkable people and phenomena. One of the most remarkable of these was a man named Jonas Carpenter who was born in London, England, in the year 1742, being now 149 years old. He is now on his way to California on a visit to his son-in-law, who is over 60 years old, and is stopping over at the house of W. T. Sawyer, a native of his own state.

A Swindler Captured.

A New York dispatch says:—For a month or more M. D. Wheeler, now Chief of the New York Police, has been receiving reports that a swindler named Jacobus was in the city. Wheeler has been receiving reports that a swindler named Jacobus was in the city. Wheeler has been receiving reports that a swindler named Jacobus was in the city.

A Tribute to Prohibition.

The editor of a prominent organ of the whiskey interest, at Louisville, with a number of his whiskey friends, is opening a letter to the editor of the Chicago Tribune, in which he says that he is a member of the Prohibition Society, and that he is a member of the Prohibition Society.

The Virtues of Borax.

The excellent washerswomen in Holland and Belgium, who "get up" their linen so beautifully white, use refined borax as a washing agent instead of soda, in the proportion of one large handful of powder to about ten gallons of boiling water. They use it in soap nearly all the time. The large washing establishments also use the same. For lace, cambric, etc., an extra quantity of the powder is used; for crinolines, a smaller quantity is used. A strong solution is necessary. Borax being a neutral salt does not in the slightest degree irritate the texture of the linen. Its effect is to soften the hardest water, and therefore it should be kept on every toilet table. Its taste is so pleasant that it is used for cleaning hair, and is an excellent dentifrice, and in hot countries it is used in combination with tartaric acid and bicarbonate of soda as a cooling beverage. Good tea cannot be made with hard water; all made by adding a teaspoonful of borax powder to an ordinary sized kettle of water, in which it should boil. The saving in quantity of tea used will be at least one-half.

Manitoba Wheat.

The advice from Manitoba and the Northwest in regard to the ripening wheat crop are not altogether favorable. The crop will doubtless be large, but the weather has been so dry that the grain is not so well as it should be. The crop will doubtless be large, but the weather has been so dry that the grain is not so well as it should be.

Justice Street.

Justice Street has indicated that he cannot overstep the price and grant bail to Edward Handcock, who is awaiting trial for the murder of his daughter, Supra Handcock. It has always been the practice to refuse bail to prisoners awaiting trial on the charge of murder, and it is not likely that Justice Street will make an exception in this case.

Why It Is the Best.

Because it combines the best features of the best English and American Encyclopædias, and is written by the foremost men of the age at a cost of more than a million dollars. It is the most complete and practical information of any people never before of access to the history of the world, the progress of science, the state of the arts, and the condition of the human mind. It is a perfect library of general knowledge, and is the most valuable work of the age.

Good Live Agents Wanted.

JAMES CURRIE, Publisher, STIRLING, - - ONT.

County and District Items.

A cheese board has been established in Pictou. E. J. Harrison, Cressy, has sold 6 feet 6 inches of the finest cheese in the county. Over 150 residents of Newmarket are camped out at Stony Lake. A sturgeon weighing 151 pounds was recently washed ashore at Wellington. Clark Buckley, Hallsville, committed suicide by hanging himself in a barn. Thereabout 500 more years of land under the Prince Edward name this year. It is stated that Kingston will certainly have an electric street railway next summer. There is said to be nearly one hundred cheese factories in operation in Hastings County. Three hundred and forty bushels of barley were taken from six acres of land on a farm near Corbyville. Twelve of the Thousand Islands near Ganongue were recently sold by auction for \$100,000. Kingston is the next town to be afflicted with the natural gas craze which has proved a failure in Belleville. A woman was observed in Colborne bearing a man away from a house because he was too late to carry water. Archbishop Cleary laid the corner stone of the new house of providence, Kingston, on the 18th inst.

When Markets.

On account of the reported short crop in Europe, and the consequent demand that is expected for wheat the market has become excited in New York, Montreal and other points a few days ago. The market has been made in price, though the advance was not sustained. The Montreal Prices in reporting the situation says:—The regular grain traders who do a large business with Europe are probably getting calmer than the speculators, who, having for weeks past been receiving orders from Europe to buy, and in anticipation of an advance have probably had considerable quantities on their hands. There are present here, will be, as usual, in view of the large crops promised in America, they have acted cautiously. Some commercial men here are of the opinion that the present prices are high and that they will not be sustained. They think that in spite of the undenial failure of the crops in Russia and in Asia, and in spite of the large European demand, there is now a glut of wheat in the market, and that the price will be forced down. The large crop in America will bring about a decline in price, or at all events, prevent an advance.

Comparative statement of the total exports of grain from the Dominion for the fiscal year ending June 30, 1891, as follows:

	1890.	1891.
Wheat	3,521,181	4,575,472
Barley	27,000	25,000
Oats	17,500	17,500
Rye	17,500	17,500
Miscellaneous	17,500	17,500
Total	3,593,681	4,652,972

Late Foreign News.

A NEW ENGINE.

Sad Death of a Young Lady.

ACCIDENT AT A PUBLIC RACE.

The population of Belgium amounted on the last day of July to 17,041, Brussels has about 500,000 inhabitants.

French drummers are to be excluded from Alsace-Lorraine, and French troops of shuffling German drummers out of France.

Rou, or the collection of schools which constitute what is popularly known as Rou, has a thousand scholars.

Japanese lace is coming into the market. It is a new manufacture, and hitherto has been mainly consumed at home.

Baron Osten Sacken, a descendant of Napoleon's Field Marshal, rich and married, committed suicide lately in Dusseldorf, a seaside resort in Lavinia, because of the army of the east.

Possibly Zeilung takes a very gloomy view of the economic situation of Germany. There is a great destitution among the lower classes on account of the high price of provisions.

At Freiberg, Saxony, lightning struck three times out of the mines, and the third time it knocked senseless several miners working 300 metres deep under the surface of the earth.

At Belfort, the great stronghold of France on the eastern frontier, a new engine of warfare is being constructed. It is a large vehicle with twenty-eight spurs. It is to be tried at the great manoeuvres of the army of the east.

An employee at one of the large French arsenals was recently charged with having stolen two tons of ammunition from the works of Sir William Armstrong at Newcastle. He made use of a friend's name, which he knew, and who resided in a high position under the Government.

The greatest manures in the world appear to be the Sakants of the Congo region, where their trial consists in passing the manure down to the quick with an instrument designed for that particular purpose.

A tremendous pile of manure is reported in Paris. For example, 45,000 copies of the last production of a popular writer have been sent to the publisher, and the same publisher has 3,000,000 volumes on hand, which are unusable.

The military authorities have discovered that various kinds of manure are not quite proper, and several poets and composers have been applied to supply the army with more unobjectionable songs in French and Flemish to take their place.

Some of the small shopkeepers of Paris have appealed to the Government, and have been taken into consideration by the great concerns that are driving them out of trade. They ask the Government to formulate some plan for the relief of the small shopkeepers, and to the freedom of trade and competition to the little dealers on the line in the presence of the great.

A nervous and horrible accident happened at a private house in Paris. The host had invited a number of friends to luncheon. Great Danish beer had been in the room, and the guests were drinking freely.

He drank a glass of beer, and then he took up the glass with a spring loaded his throat and killed him. The guests were all shocked to pull the beast out, but without avail.

Some alarm and much anxiety are felt for Emin Pasha's health. He is suffering from a severe attack of dysentery, and his condition is very precarious.

Zeitung announces that Kurt Elert in Zanzibar has received from Emin Pasha a letter in which he has expressed his regret that he had been forced to leave Zanzibar. Since then nothing has been heard from him, and rumors of his death have been repeatedly repeated in the press.

A new kind of stamps will soon be introduced into the postal service of Germany, and a view to securing the inviolability of the privacy of letters. The new stamp is intended to be used in the case of letters which are to be sent by post, and it is to be used in the case of letters which are to be sent by post.

The question of introducing the study of living Oriental languages into the Russian commercial school is being discussed. It is believed that the ignorance of such languages is one of the principal reasons why Russian traders are so generally successful in the markets of Persia, China, and Japan. It is thought that if Russian traders were to learn the languages of the countries to which they export, they would be able to do so more successfully.

The old-fashioned Russian wagon driver (chokun) who carries his passengers in a freight long distance in his rude self-constructed vehicle, is still competing successfully with the steam locomotive in the case of the White Car. A merchant of Simferopol has led most to follow a large shipment of salted meat to the Black Sea coast, and he has taken 48 kopeks per pod (35 English pounds for transportation). The same wagon driver has taken 12 kopeks per pod. It is said that he will be able to do so for some time to come.

The Russian Ministry of the Interior and Finance have sent a circular to all the Governors and the Communal Councils of the Interior, directing them to take the utmost care in the selection of grain for the needs of the army and the maintenance of the peasantry of their respective districts for the coming agricultural year. The estimates must be submitted by exact accounts of the grain actually produced in the communal districts, and the probable yields of the standing crop. There is a strong movement to prohibit the exportation of grain to foreign lands until next spring.

The Alexandrovsky and Potokovsky flour and steel rolling mills cannot produce all the materials required for the new vessels for the Russian Navy. The Government has decided to build a new mill in the city of St. Petersburg, and to have it built by the best foreign engineers.

The Spanish and Portuguese Governments have notified the Russian Government that at the expiration of the present treaty they will discontinue their commercial treaty with Russia. The Russian Government has replied that it will not do so, and that it will continue to trade with Spain and Portugal.

At about the same time the commercial treaty between Russia and Portugal was renewed for a further period of ten years. The new treaty is a very favorable one for Russia, and it is believed that it will be a great success.

The produce merchants have presented a petition to the Agricultural Department of the Ministry of Imperial Property and of the Interior to promote the cultivation of jute in the waters of the Black Sea. At present, jute is imported from India at a price of 120 per pod. It is believed that if it were cultivated in the Black Sea, it would be a great success.

At present, jute is imported from India at a price of 120 per pod. It is believed that if it were cultivated in the Black Sea, it would be a great success.
